## **1. NTA at a Glance**

With the unprecedented innovations in the field of telecommunication services and rapid telecommunications development in the world, it has become necessary to bring the same pace of development and expansion in this sector in Nepal also. Keeping in harmony with the currently evolving new technological developments, the emerging craze for globalization and liberalization or market economy concept, it is felt that the resources and efforts of His Majesty's government alone cannot fulfill the steadily increasing demand of the telecommunication services in a competitive environment. Even though the private sector entrepreneurs are interested in investing in the novel sectors, flow of private sector capital in productive areas could not be made effective due to unfavorable environment and lack of opportunities. Taking this scenario into account, the National Communication Policy 1992 A.D. envisaged the concept of encouraging the private sector participation for providing telecommunication services to the public and to assist to the extent possible as is deemed necessary in an easily available, simple and well planned manner for the development, expansion and operation of this sector inside the kingdom of Nepal as well as abroad.

With this concept, using liberalization policy and involving the private sector in a competitive environment for the development and expansion of telecommunication sector in Nepal, His Majesty's Government of Nepal's decision dated December 25, 1995 has initiated the involvement of the private sector in the development of the telecommunication services. Nepal Telecommunications Authority as an autonomous regulatory body has been established on March 4, 1998 as stipulated within the framework of the Telecommunication Act 1997 A.D. and Telecommunication Regulation 1998 A.D. to make this work more systematic and regular.

## **2. Telecom Network of the Country**

- 2.1 The Nepal Telecom (NDCL), Nepal's incumbent telecommunications operator, has made significant progress in the growth and development of the national public switched telecommunications network (PSTN) in the last decade, particularly during Nepal's Fifth Phase Telecom Project (1992-97).
- 2.2 The same tempo of growth continues in the ongoing Seventh Phase, with the number of distributed lines increasing from approximately 65,000 in 1992 to over 4,33,631 (fixed line), Post-paid Mobile Subscribers 75,645 and Pre-paid Mobile Subscribers 1,73,175 till 15 April, 2005. The network is fully digital and offers full national and international direct dialling services.
- 2.3 The national trunk network is equipped with 1762 MBPS, out of which 788 MBPS broadband microwave system is being used to link Kathmandu with the rest of the country.
- 2.4 Rural service was expanded in Nepal under the Fifth Phase Telecom Project, through Japanese (JICA) and IDA (World Bank) fund. Country's 75 district centres have automatic telecommunications service, including STD and ISD. This access is usually provided by NDCL or a privately operated public call office (PCO) or a phone shop. Sixty-eight district centres have communications services

to some neighbouring VDCs by means of 2 MBPS microwave links, MARTS, single channel VHF/UHF or Very Small Aperture Terminal (VSAT) services. The following table summarises types of technology used to provide telecommunications services to the VDCs of Nepal as of 15 April, 2005.

<b>Technology used by NDCL to serve VDCs</b>	
Digital C-DOT (wire line) exchanges	47/8,654 (Exchange/Capacity)
MARTS	539/2,758 (Marts Terminals/ Telephone Subscribers)
VHF/UHF radio	1,034 (Telephone Subscribers)
Digital microwave (JICA project)	3/70 (Rural Station/Substation)
HF radio	4
VSAT	309 (Telephone lines)
VDCs served with at least one PCO	1,963

- 2.5 NDCL has achieved the following rural service penetration levels as of 15 April, 2005. Percentages identified in the table refer to the percentage of VDCs with at least one PCO in the specified region.

<b>Region</b>	<b>Total VDCs</b>	<b>VDCs Served with at least one PCO</b>	<b>% of VDCs Served with at least one PCO</b>
Nepal	3,914	1,963	50.15%
Eastern Development Region	893	462	51.73%
Central Development Region	1199	599	49.95%
Western Development Region	864	494	57.17%
Mid-Western Development Region	575	215	37.39%
Far-Western Development Region	383	193	50.39%

- 2.6 United Telecom Limited (private sector basic telecommunications operator based on WLL technology) has started its own International Gateway from 19th April 2004 and is providing its service in Kathmandu Valley. Total subscriber of WLL telephone service is 31000 as of 15 April, 2005.
- 2.7 The total telephone penetration rate (i.e. 1 phone to 100 citizens) in Nepal is around 3.07% (2% in fixed line and 1.07% in mobile)

### **3. Rural Telecommunications Service Policy**

- 3.1 NDCL is providing Rural Telecommunications Service in the entire country, except 534 Village Development Committees of Eastern Development Region, where NTA has licensed STM Telecom Sanchar Pvt. Ltd. to provide at least two telephone lines in each Village Development Committee.
- 3.2 Being a VSAT based Rural Telecom Operator in Eastern Development Region, STM Telecom Sanchar Pvt. Ltd. has installed the hub stations at Kathmandu and

Biratnagar and has installed 542 VSAT terminals in 271 VDCs of Eastern Development Region till April 15, 2005.
